

Need Upper Level credits? Want to have some fun while you are learning?

Then consider registering for this "once in a lifetime" class for **Fall 2008**:

PHYSICS OF STAR TREK

PHYS 4399 (CRN: 43011 MW 1:30–2:45 BSH 119)

Inquiring minds want to know:

- Can we really travel at warp speed?
- What would it take to make a hand-held phaser?
- Could we EVER have a communicator that could flip open and let you talk to **anyone** on the planet??
- How long would it really take before reproducing Tribbles would fill your starship?

For the answers to these and many more entertaining questions, sign up now for this once-in-a-lifetime Selected Topics course! All majors welcome!

Principal instructor Dr. Hubert Zitt will be a guest of UIW during the Fall 2008 semester. Dr. Zitt is an Associate Professor of Information Technology & Electrotechnology at the University of Applied Sciences, Kaiserslautern, in Zweibrücken, Germany. He is eagerly looking forward to returning to San Antonio and has great memories he has of his stay here in 1991. He speaks German, English, French, and some Spanish.

Professor Zitt is famous across Europe for his amazing presentations and books on the physics behind the science fiction that looks so real in Star Trek. Don't miss this opportunity!
